

Stock Web Performance Calibrated Dataset

Calibrated is Similarweb's dataset designed for quants and data scientists who need point-in-time accuracy and full modeling control. Unlike traditional datasets that can shift with algorithmic updates or smoothing, Calibrated provides raw, panel-normalized web traffic data, captured and locked daily to reflect exactly what was observed, when it was observed.

Built with flexibility and precision in mind, Calibrated empowers investors to extract insights on their terms, in their models – with confidence in every data point.

Dataset Overview

Scope	Global: Americas, EU, Asia
Coverage	56,597 Tickers mapped to 283,166 Desktop domains. 37,804 Tickers mapped to 137,221 Mobile domains.
History	7.5 years (ongoing)
Granularity	Daily
Speed	Same day speed (06:00 EST)
Available metrics	Visits, Unique visitors, Bounce rate, Pages per visit, Average visit duration
Devices	Desktop and mobile web
Delivery	AW3

Point-in-time accuracy

Mapped to tickers

Panel-based data

Same-day speed

The gold standard in investor-grade digital data.
